

Call For Paper FAEA 47

The 47th Conference of Federation of ASEAN Economic Associations “Sustainable Transformation of ASEAN Economies Under Major Challenges: Climate Change, Geopolitical Conflicts, Digital Technology, Aging, and ASEAN Centrality”

Hotel in Bangkok (to be confirmed by October 30), Thailand
22-23 January 2025

The Federation of ASEAN Economic Associations (FAEA) is pleased to announce its annual conference, focusing on the ****sustainable transformation of ASEAN economies**** amidst a rapidly evolving global landscape. ASEAN countries are facing an intricate array of challenges, including climate change, geopolitical conflicts, rapid advancements in digital technology, particularly Artificial Intelligence (AI), and demographic shifts such as aging populations. In addition, the concept of **** ASEAN Centrality****—the idea that ASEAN remains at the core of regional economic, political, and security architecture—is increasingly crucial in navigating these challenges and ensuring cohesive regional integration.

Conference Objectives:

- To analyze the economic impacts of climate change on ASEAN countries and explore sustainable solutions to mitigate these effects while promoting economic growth.
- To discuss the economic implications of current and emerging geopolitical conflicts and their influence on trade, investment and regional cooperation in ASEAN.
- To explore the opportunities and challenges presented by rapid advancement in digital technology, particularly AI, in driving economic transformation, productivity, and innovation.
- To address the socioeconomic challenges of aging populations in ASEAN countries, focusing on labor market dynamics, social security systems, and economic growth strategies.
- To reaffirm the importance of ASEAN Centrality in regional economic integration, security, cooperation, and global geopolitics, ensuring ASEAN remains at the cores of evolving economic and security architectures.
- To foster collaboration among ASEAN countries to share best practices, policy solutions, and innovative approaches to sustainable economic development.

Scope of Call for Papers:

- Current issues, challenges as well as assessment of ASEAN member countries' socio-economic development and sustainability.
- Analyzing the economic impacts of climate change on ASEAN countries and explore sustainable and resilient solutions to mitigate these effects while promoting economic growth.

- Geo-Politics and Economic Integration: ASEAN perspectives and alternative policy measures/instruments.
- Exploring the opportunities and challenges presented by rapid advancement in digital technology, particularly AI, in driving economic transformation, productivity, and innovation.
- Deepening and broadening of ASEAN member countries’ sustainable socio-economic-technological development cooperation.
- Other socio-economic development issues relevant to ASEAN member countries’ socio-economic development.
